**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### **DETAILED ACTION**

1. Claims 21-26 are currently pending.

#### ***Claim Rejections - 35 USC § 103***

2. Claims 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 4,906,573 for the reasons set forth on pages 2 and 3 of the previous Office action.

All of applicant's arguments regarding this ground of rejection have been fully considered but are not deemed persuasive. Applicant argues that US '573 teaches away from the present invention because Barney teaches a medium that is a solid medium not the claimed nutrient broth. However, a person of ordinary skill in the art would understand that the culture medium taught by Barney could be formulated in broth form. All of the ingredients in Barney that support the cultivation of microorganisms can be used in a broth; therefore, the modification of Barney into broth form would be an obvious modification. In addition, the medium of Barney is in liquid form before it is allowed to harden in the petri dishes (see column 2, lines 18-33).

Applicant also argues that a person of ordinary skill in the art would only be motivated to add a pH indicator dye to a liquid medium. However, as stated above, Barney could be modified into a liquid form. A pH indicator would be obvious to add to this broth. In addition, it is known in the art to add pH indicators to solid media. For example see the claims of US Pat. Nos. 4,528,269 and 4,68,456.

Applicant also argues that US '573 does not teach using a dual buffer system. However, US '573 teaches using two buffers in the culture medium. Each of the buffers used by US '573 has a different pKa; therefore, the buffer system of US '573 appears to be the same as that

Art Unit: 1654

claimed by applicant. Thus, the buffers of US '573 would have to function in the same manner as the buffers claimed by applicant.

3. No claims are allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
